

# REVOLUTION

The revolution is here. The new Diego™ Powered Dissector replaces conventional shavers for ENT/Head and Neck procedures. Designed by a multidisciplinary team including leading ENT surgeons, Diego's unique design allows 360-degree one-handed fingertip revolution of disposable dissecting blades and burrs. Comfortably held in the palm with just two or three fingers, Diego features a true "straight-through" suction path that virtually eliminates clogs. Surgeons report operating times reduced up to 20% with precision dissection that reduces damage to healthy adjacent tissue. With a revolutionary ergonomic design and significant performance advances, Diego establishes a new powered dissector category that replaces shavers previously used for many ENT cases.

Actual Size

**Ergonomic design uses a relaxed, natural hand position to maximize comfort and control**

**Fast, easy, 360-degree one-handed fingertip blade revolution**

**"Straight-through" suction path virtually eliminates clogs**
